

sta*kleen®

PERFORMANCE FABRIC

* Appearance

Sta-Kleen, the first stain resistant faux leather upholstery, is perfect for high-traffic areas where style is as important as performance. It has a sophisticated appeal that looks and feels so much like real leather, you'll hardly believe it's faux.

* Performance

Sta-Kleen is not a topical finish. Its stain resistant properties come from a proprietary chemical bonding process that cross-links a stain shield into the fabric. Sta-Kleen creates an invisible barrier to keep stains, including the indigo dye of blue jeans, from transferring to the upholstery. It will last the life of the furniture because it is part of the furniture.

* Maintenance

Ballpoint pen can be dry erased. Tough food stains like ketchup can be easily removed. Topical antiseptics, lotions and creams that would stain conventional upholstery forever are wiped away. Regular cleanings and the removal of difficult stains will not damage nor diminish Sta-Kleen's finish, performance or high-style appeal.

* Environment

Sta-Kleen contains no lead or other heavy metals. It is PVC, phthalate and formaldehyde free. Sta-Kleen meets State and Federal flammability requirements.

Care and Cleaning Instructions

Day-to-Day Cleaning — Remove ordinary dirt and smudges with mild soap and water. A 5:1 ratio of water to bleach solution may be used as a disinfectant. Rinse the surface with clean water after disinfecting. Dry with a soft, lint-free cloth or towel. The use of conditioners or protectants is not required, nor recommended, for use on Sta-Kleen upholstery – its cleanability is permanent and won't wear out.

Stain Removal — Upholstery protected with Sta-Kleen is resistant to most common stains. To keep your furniture looking new, stains such as ballpoint pen can be dry-erased with a clean, lint-free cloth. Gently rub the area until the stain has been removed. Wet or gooey stains such as food stains (e.g., ketchup) or topical stains (e.g., antiseptics, lotion and cream) should first be wiped off with a clean cloth or sponge, then follow the instructions above.

Stubborn Stains — If a ghost stain remains, apply a small amount of household rubbing alcohol (91% isopropyl alcohol) to a clean, lint-free cloth and rub the stain until it has been removed. Rinse with a clean, damp cloth and go!
