WE'RE MAKING OUR PACKAGING MORE SUSTAINABLE

We're transitioning from single-use plastic to paper-based packaging. As we progress, you may find a mix of paper and plastic in our boxes.

NOUS RENDONS NOS EMBALLAGES PLUS DURABLES

Nous passons des emballages en plastique à usage unique aux emballages à base de papier. Durant la transition, vous pourriez trouver un mélange de papier et de plastique dans nos boîtes.

QUEREMOS HACER MÁS SUSTENTABLES NUESTROS MATERIALES DE EMBALAJE

Estamos cambiando las bolsas de plástico desechables por bolsas con base de papel. Conforme avanzamos en este propósito, puedes encontrar una mezcla de papel y de plástico en nuestras cajas.

LEGO® Builder

SIMPLE, WILD EXISTENCE

When you explore nature with a curious mindset, you inevitably feel a sense of duality in the change of seasons. Decay coexists in perfect harmony with new life. This LEGO® built ecosystem captures a magical slice of a forest floor at the edge of a Northern European woodland, at the transition from summer to fall. Imagine a bountiful foraging trip, where you get to explore a rich variety of fungi and autumn crocuses. While such a dense collection of species might be improbable in nature, we wanted to create a visually captivating – and theoretically plausible – scene. Every element is designed with care to balance realism with a whimsical charm.

The LEGO® Botanicals Design Team

UNE EXISTENCE SIMPLE ET SAUVAGE

Lorsque l'on explore la nature avec un esprit curieux, on ressent inévitablement un sentiment de dualité dans le changement des saisons. La décomposition coexiste en parfaite harmonie avec la nouvelle vie. Cet écosystème construit par LEGO® capture une tranche magique d'un sol forestier à la lisière d'une forêt d'Europe du Nord, lors de la transition entre l'été et l'automne. Imaginez une excursion fructueuse, au cours de laquelle vous pourrez explorer une riche variété de champignons et de crocus d'automne. Bien qu'une collection aussi dense d'espèces soit improbable dans la nature, nous avons voulu créer une scène visuellement captivante – et théoriquement plausible. Chaque élément est conçu avec soin afin d'équilibrer le réalisme avec un charme fantaisiste.

L'équipe de conception de LEGO® Botanicals

UNA EXISTENCIA TAN SENCILLA COMO SALVAJE

Cuando exploras la naturaleza con una mentalidad curiosa, es inevitable que percibas una sensación de dualidad durante el cambio de estaciones. La decadencia coexiste en perfecta armonía con la vida nueva. Este ecosistema construido con LEGO® captura una mágica porción de suelo de los bordes de un bosque del norte de Europa cuando tiene lugar la transición del verano al otoño. Imagina una fructífera excursión de búsqueda de alimentos silvestres que te permita explorar una amplia variedad de hongos y colchicos de otoño. Aunque una concentración tan densa de especies podría ser improbable en la naturaleza, queríamos dar forma a una escena visualmente cautivadora y, al menos en teoría, plausible. Cada elemento está diseñado con todo cuidado para equilibrar el realismo con un encanto caprichoso.

El equipo de diseño de LEGO® Botanicals

Colchicum autumnale

AUTUMN CROCUS

Unlike its spring cousin, this pink and purple crocus belongs to the Colchicaceae family and blooms in the fall. Elegant and graceful, yet toxic, it thrives in grasslands and woodlands in Europe and Asia.

CROCUS D'AUTOMNE

Contrairement à son cousin printanier, ce crocus rose et violet appartient à la famille des Colchicaceae et fleurit à l'automne. Élégant et gracieux, mais toxique, il pousse dans les prairies et les forêts d'Europe et d'Asie.

COLCHICO DE OTOÑO

A diferencia de su primo primaveral, este colchico rosa y morado pertenece a la familia de las colchicáceas y florece durante el otoño. Elegante y delicado, aunque también tóxico, crece en praderas y bosques de Europa y Asia.

Pteridium aquilinum

BRACKEN

One of the most common plants in the world, it thrives in sun or shade, grasslands or busy areas. With fronds that grow up to 3 ft. (1 m), it's a popular and decorative garden display.

FOUGÈRE-AIGLE

C'est l'une des plantes les plus répandues dans le monde. Elle prospère au soleil ou à l'ombre, dans les prairies ou dans les zones très fréquentées. Avec des frondes pouvant atteindre un mètre, il s'agit d'une plante décorative très appréciée dans les jardins.

HELECHO

Una de las plantas más comunes del mundo, crece tanto al sol como a la sombra, y tanto en praderas como en zonas concurridas. Con frondas que se extienden hasta 1 m, es una planta muy popular para decorar jardines.

Mycena galericulata

COMMON BONNET

This delicate, bell-capped clusterer is found on fallen logs and stumps in damp areas and mixed woods. Known for its beautiful, enchanting appearance, it has inspired artists for ages.

MYCÈNE EN CASQUE

Cette délicate grappe à chapeau en forme de cloche se trouve dans les zones humides et les bois mixtes, sur les troncs et les souches tombés au sol. Connue pour sa beauté et son aspect enchanteur, elle inspire les artistes depuis des lustres.

HONGO BONETE

Es común encontrar este delicado hongo con forma de campana en áreas húmedas, donde forma pequeños grupos sobre troncos caídos y árboles muertos. Conocido por su belleza encantadora, ha inspirado a artistas durante siglos.

Pleurotus ostreatus

OYSTER MUSHROOM

Look for these popular shell-like caps with decurrent gills and short – or absent – stems on decaying wood in forests or even urban areas. They are typically white or gray and can grow up to 9.8 in. (25 cm) wide.

PLEUROTE

Recherchez ces populaires capsules ressemblant à des coquillages avec des lamelles décurrentes et des tiges courtes – ou absentes – sur le bois en décomposition des forêts, ou même dans les zones urbaines. Elles sont généralement blanches ou grises et peuvent atteindre 25 cm de large.

SETA

Estos populares hongos con forma de concha, láminas decurrentes y tallos cortos (o ausentes) crecen sobre la madera en descomposición, tanto en los bosques como en zonas urbanas. Suelen ser blancos o grises y pueden alcanzar una anchura de hasta 25 cm.

Cantharellus cibarius

GOLDEN CHANTERELLE

Chanterelles flare their golden trumpets with blunt, forked ridges in place of gills. Notoriously elusive, foragers often carefully guard their locations and treasure them as an exquisite delicacy.

CHANTERELLE

Les chanterelles déploient leurs trompettes dorées avec des crêtes émousées et fourchues à la place des lamelles. Les cueilleurs de champignon protègent souvent soigneusement les lieux de cueillette des chanterelles, réputées pour leur rareté, et les considèrent comme un mets raffiné.

HONGO CHANTERELLE

Los hongos chanterelle exhiben unas trompetas doradas con pliegues gruesos y ramificados en lugar de láminas. Tienen fama de ser difíciles de encontrar, por lo que los recolectores suelen proteger cuidadosamente sus ubicaciones, atesorándolas como fuentes de un manjar exquisito.

Amanita muscaria

FLY AGARIC

With a glossy red-orange cap flecked with white, the fly agaric adds a vibrant splash of color in European winters, often found beneath birch, pine and spruce. When seen in the wild, handle with care!

AMANITE TUE-MOUCHES

Avec son chapeau rouge-orange brillant moucheté de blanc, l'amanite tue-mouches ajoute une touche de couleur vibrante aux hivers européens. On la trouve souvent sous les bouleaux, les pins et les épinettes. Lorsqu'elle est observée dans la nature, à manipuler avec précaution!

HONGO MATAMOSCAS

Con su brillante sombrero de color rojo anaranjado y salpicado de manchas blancas, el hongo matamoscas aporta una vibrante pincelada de color a los inviernos europeos y suele encontrarse debajo de abedules, pinos y abetos. Si lo ves en la naturaleza, ¡manéjalo con cuidado!

Inocybe hirtella

MARZIPAN FIBRECAP

Despite its name and a fibrous cap with an almond-like scent, this mushroom is best when admired from a safe distance! Found in grassy areas, it provides sugars and nutrients to surrounding trees.

INOCYBE HIRSUTE

Malgré son nom et son chapeau fibreux à l'odeur d'amande, ce champignon gagne à être admiré à bonne distance! Présent dans les zones herbeuses, il fournit des sucres et des nutriments aux arbres environnants.

PARAGÜITAS MALO

Su nombre lo advierte y, a pesar de que su sombrero fibroso despide un irresistible aroma parecido al de las almendras, ¡es mejor admirar este hongo desde una distancia segura! Podrás encontrarlo en zonas cubiertas de hierba, donde proporciona azúcares y nutrientes a los árboles circundantes.

Geastrum triplex

COLLARED EARTHSTAR

Look for this spectacular mushroom in woods and grasslands. From a round, spore-filled body, it opens its star-shaped arms to release its spores in a veritable miniature fireworks display!

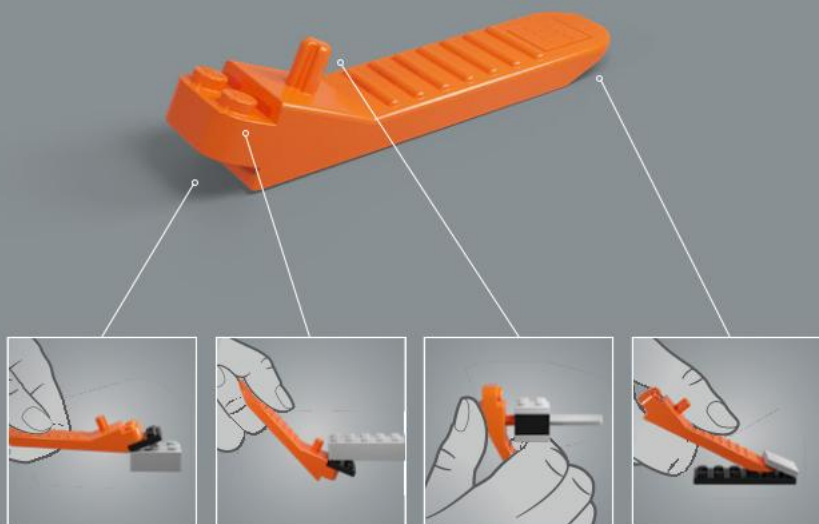

GÉASTRE À TROIS PLIS

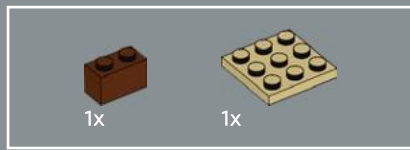

Cherchez ce champignon spectaculaire dans les bois et les prairies. À partir d'un corps rond rempli de spores, il ouvre ses bras en forme d'étoile pour libérer ses spores dans un véritable feu d'artifice miniature!

ESTRELLA DE TIERRA

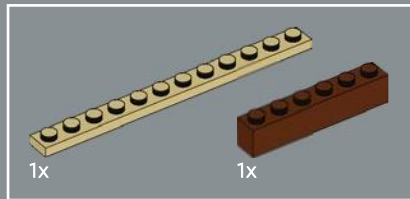

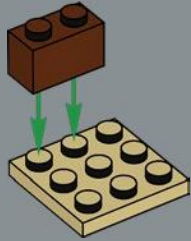

Busca este espectacular hongo en bosques y praderas. Desde un cuerpo redondo lleno de esporas, ¡extiende sus brazos en forma de estrella para liberarlas en lo que podría considerarse un auténtico espectáculo de pirotecnia en miniatura!

Claw elements can be used for much more than LEGO® animals and creatures. Here, they make up the gills under the large fly agaric mushrooms.

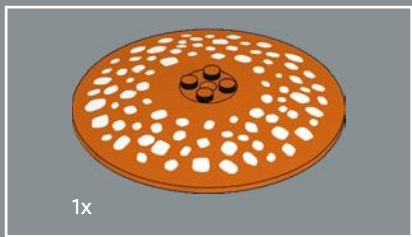

Les éléments de griffes peuvent être utilisés pour bien plus que les animaux et créatures LEGO®. Ici, ils composent les lamelles sous les gros champignons de l'amanite tue-mouches.

Los elementos que representan garras pueden usarse para mucho más que animales y criaturas LEGO®. Aquí, forman las láminas de debajo de los grandes hongos matamoscas.

When recreating whimsical shapes, all sorts of LEGO® elements come into play. For the collared earthstar's characteristic form, we combined triangular street signs with minifigure shield elements.

Pour recréer des formes fantaisistes, toutes sortes d'éléments LEGO® entrent en jeu. Pour la forme caractéristique du géastre à trois plis, nous avons combiné des panneaux de signalisation triangulaires avec des éléments de bouclier de figurine.

A la hora de recrear formas caprichosas, entran en juego todo tipo de elementos LEGO®. Para recrear la forma característica de la estrella de tierra con collar, combinamos señales de tráfico triangulares con escudos de minifiguras.

The common bonnet, with its delicate cap and slender stem, looks like it's been plucked straight from the pages of a fairytale – their tops are made with LEGO® dwarf minifigure hats.

Le mycène en casque, avec sa délicate coiffe et sa tige élancée, semble tout droit sorti des pages d'un conte de fées. Son sommet est fait de chapeaux de figurines de nains LEGO®.

El hongo bonete, con su delicada copa y su esbelto tallo, parece sacado directamente de las páginas de un cuento de hadas. El sombrero de esta versión es, en realidad, un sombrero de minifiguras LEGO® de enanos.
