TROUBLESHOOTING

I cannot remove the Test Tube from the Mutation Chamber. I do not see it inside.
The Top Button is not moving when I push it.
Chamber Seal is not rotating.

• Make sure that zip ties have been removed as shown in step #1.
When I pour the Mutation Fluid into the Mutation Chamber, I do not see it inside.

• Ensure there is nothing blocking the port on the side of the Mutation Chamber.
Nothing happens when I push the Fingerprint Scanner Button.

• Make sure you are pushing down on the Fingerprint Scanner Button hard enough to activate the mutation reaction.
• Try pushing the Fingerprint Scanner Button with 2 or 3 fingers to get more force.

Beast's joints are stiff or not moving easily.
• Your Beast will come with stiffer joints to ensure it lasts a long time and can hold its poses.
• Joints will loosen slightly over time as you play with it and become easier to move.

The Handle is not rotating.

- Make sure Top Button is pushed down to unlock Handle.
- Carefully grip it with one hand while holding the chamber with the other hand and rotate 180°.

How do I get the Beast out of the Mutation Chamber?

- After revealing your Beast, use one hand to hold the chamber in place while carefully rotating the top section counterclockwise with your other hand.
- Remove the top section to allow access to pull out the Internal Prime Chamber and Beast.

After placing the Beast and Internal Prime Chamber back into the Mutation Chamber, the Handle and Chamber Seal do not properly assemble or rotate.

- Make sure the Internal Prime Chamber was inserted correctly into the Mutation Chamber with triangular symbols aligned.
