Fully Integrated Wine Cabinet

LIEBHERR

Quality, Design and Innovation

German Engineering: Our superior products offer premium quality, cutting edge design, and innovative features that best fit your lifestyle. The use of high quality materials, perfectly detailed finishes, and elite cooling components are combined with the latest production processes, resulting in an outstanding cooling product.

SoftSystem: Liebherr's SoftSystem technology gently cushions the automatic door closing, preventing vibrations which can affect the quality of your finest wines.

Precision electronics: The precise electronic control allows temperatures to be set to the exact desired degree, from 41°F to 68°F.

LED Lighting: All Liebherr wine cabinets are equipped with innovative LED lighting, which emit minimal heat and no UV radiation, ideal for the optimal storage of wines.

Beech Wood Shelving: Liebherr wine cabinets are fitted with beech wood shelving, mounted on telescopic rails for easy and gentle access to wines. The handmade, untreated wood pullout shelves can hold a variety of bottle types.

TipOpen technology: When the door is gently tapped, TipOpen technology partially opens the appliance, facilitating further opening. If the door is not opened fully within three seconds, the door will self-close, ensuring that ideal air humidity is maintained within the cabinet.

UV Protection: In order to minimize the exposure of light which can damage the maturity of a wine, Liebherr wine cabinets are fitted with special UV-resistant insulated glass, simultaneously protecting and presenting your finest wines.

Alarm: Liebherr wine cabinets are equipped with a trustworthy alarm system which alerts the owner if the door has been left open, or if there are temperature changes.
