

Will It Fit?

Refrigerators

Buying a new refrigerator is an exciting experience. We created this guide to help you collect the information you need to make choosing your new refrigerator as easy as possible. Please use this measurement guide to ensure your new appliance will fit in its space properly. A measurement off by as little as 1/4 inch can turn the excitement of your new purchase into a major inconvenience. Double-checking your measurements will help to ensure a smooth purchase and delivery. These measurements are **not required but are suggested** to ensure you select the right product.

An appliance returned because it will not fit will cost you (the customer) a delivery fee and possibly a restocking fee. For questions or concerns about dimensions, please contact us at, 1-800-336-9136

Measure the Space

Measuring the space is one of the most important steps before selecting a new refrigerator

Measure the depth of counter on each side of the refrigerator.

Right Side _____

Left Side _____

Measure the depth from the wall to the nearest obstacle, island, etc. on each side of the refrigerator.

Right Side _____

Left Side _____

Measure the depth from the bottom of the cabinets taking account any trim.

Right Side _____

Left Side _____

Measure the height of the space from the floor to the cabinet above, in the left and right corners as well as the center.

Right Corner _____

Center _____

Left Corner _____

Measure the width of the space from the floor to the cabinet above, at the top and bottom as well as the middle.

Top _____

Middle _____

Bottom _____

Obstacles

There are a couple questions that may affect the style of refrigerator that will work in your kitchen.

Is your refrigerator in a corner?

Yes ☐ No ☐

Is there an island in your kitchen?

Yes ☐ No ☐

Walk the Path

Walking the path the installers will take is important to do before selecting a new refrigerator.

Measure any exterior doorways. The installers can remove the doors from the hinges if necessary.

Exterior Doorway _____

Measure any interior doorways. Sometimes, interior doors are narrower than exterior doors.

Interior Doorways _____

Measure the stairway. Be sure to measure the width in multiple places especially if there is a turn.

Stairway Width _____

Additional Issues

There are a few additional issues to address before you select a new refrigerator.

Do you have a water line ran to your refrigerator and what type is it, plastic, copper? Yes ☐ No ☐
Type _____

Is there a main water line shutoff in your house and is it accessible? Yes ☐ No ☐

Is there an electrical outlet where the refrigerator will be installed? Yes ☐ No ☐

Before you go, take a picture of the refrigerator area if possible. Yes ☐ No ☐

The Fun Part!

Selecting your new refrigerator

Here at Nebraska Furniture Mart we offer many styles, colors and sizes to choose from. A 25-31 cubic foot model is now considered average and will extend at least eight inches beyond the cabinets, including the door. Bottom-Mount refrigerators have a large door swing and the door orientation is reversible. French-door and Side-by-Side style refrigerators typically have less door extension. If you are considering a custom built-in refrigerator, it's important to know that they have special installation requirements.

Getting Ready for Delivery

There are a few things to do before your new refrigerator is delivered.

Make sure you double-check all the measurements for your new refrigerator for the space in your home including the height and width.

Will the depth of new refrigerator fridge extend from the wall comfortably?

Your New Refrigerator Arrives

Our delivery teams will make sure your delivery experience meets or exceeds your expectations.

- Our delivery teams are insured and qualified.
- We will provide you with a two hour window delivery notification the day prior to delivery.
- An individual 18 years or older must be present to receive the delivery.
- Our drivers will call you 30 minutes ahead of delivery.
- At that time you may proceed to empty your old refrigerator.
- Your icemaker line will be reconnected if it is copper with a working shut off valve (local delivery only).
- Your new fridge will be plugged in and tested.
- The refrigerator will be leveled without the use of blocks or shims.
- The delivery team will haul away your old unit if it has been pre-arranged.

Another Job Well Done!

If you have any additional questions, don't hesitate to call or visit any of our salespeople. We will be more than happy to answer any of your questions. Most importantly, thank you for your business!
